## (54) CORDLESS POWER STATION

(57)Abstract:

PURPOSE: To control a power receiving apparatus satisfactorily without a waste power consumption.

CONSTITUTION: A power receiving apparatus 6 has a voltage detecting means 14 and 15 which detects the voltages of the power receiving apparatus 6 and, further, has a transmitting means 16 and 17 which transmits the detection signals of the voltage detecting means 14 and 15. A power transmitting apparatus 1 has a receiving means 18 and 19 which receives the transmission signals from the transmitting means 16 and 17. A power which is transmitted from the power transmitting apparatus 1 to the power receiving apparatus 6 is controlled by the receiving signals from the receiving means 18 and 19.

## LEGAL STATUS

[Date of request for examination] 14.06.2000

[Date of sending the examiner's decision of rejection] 18.06.2002

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
